

# Chalk'it: dataflow and drag-and-drop Python dashboarding

## What is Chalk'it ?

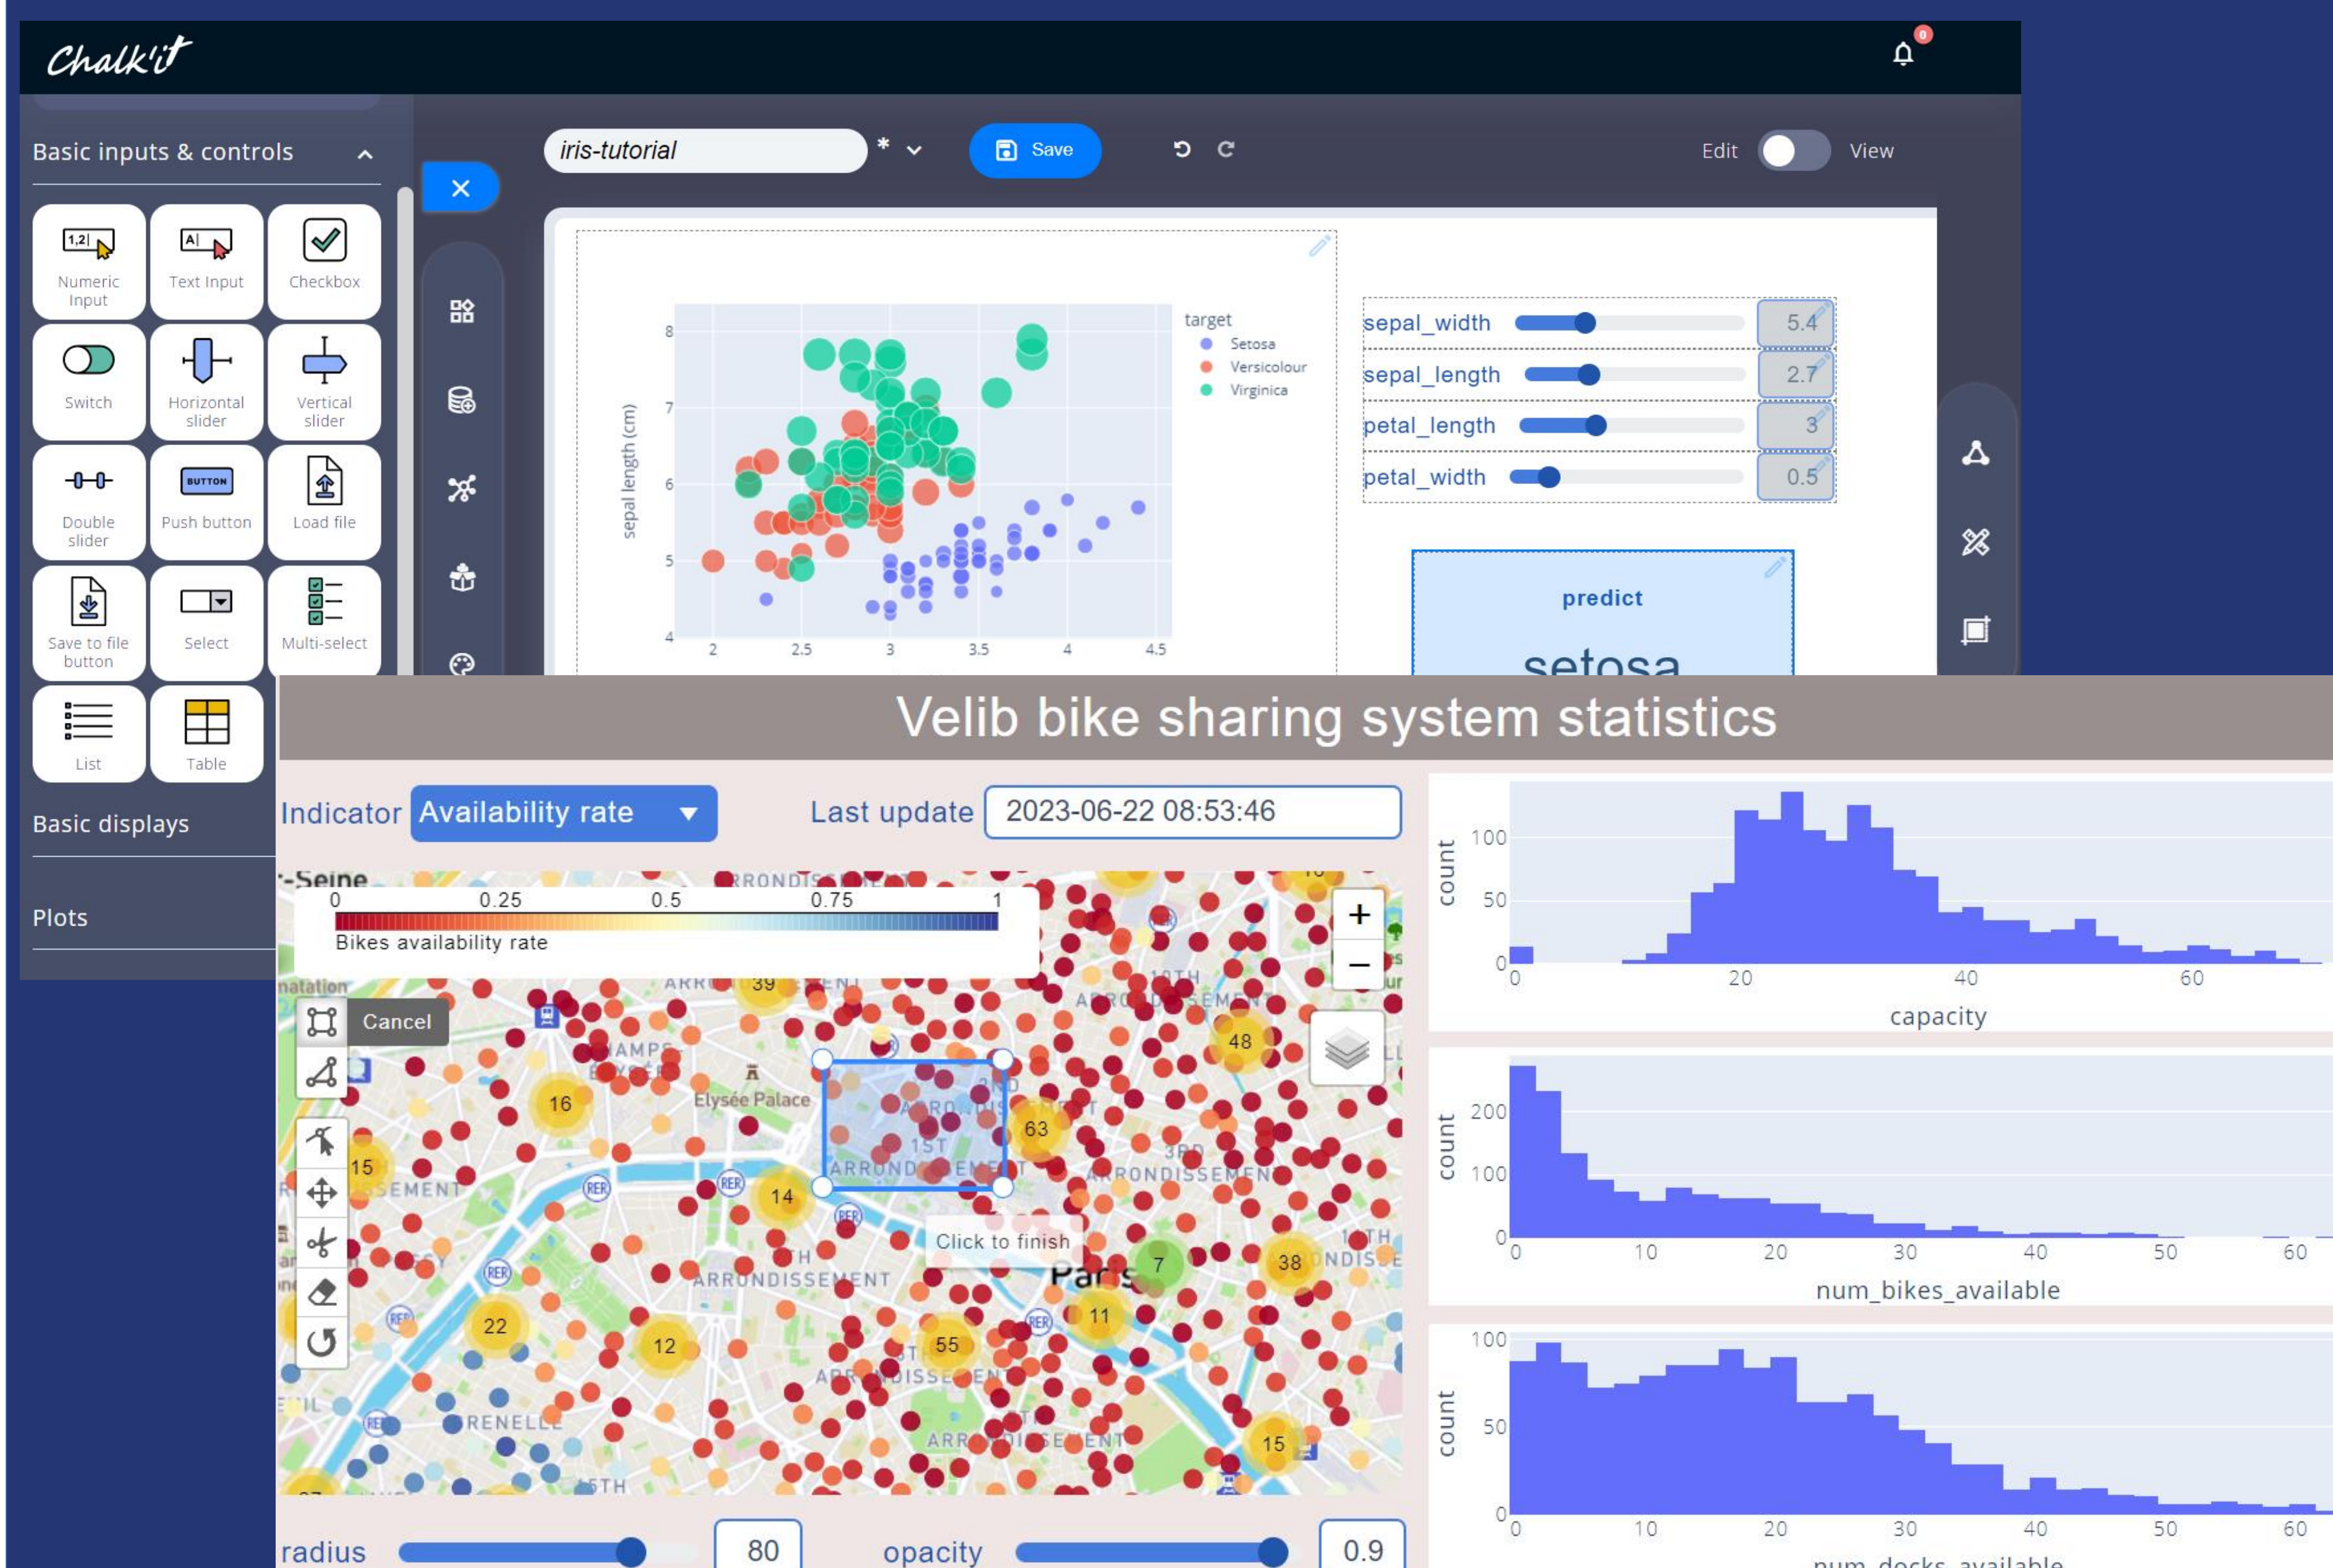

Chalk'it is an **open-source** framework that helps to convert **Python** scripts into shareable **web application** dashboards

## Features:

- Synchronous **dataflow** execution engine
- Runs in the web browser, thanks to **Pyodide**
- Supports more than 44 widget types including Plotly, Matplotlib, Folium, ECharts, Leaflet, Geoman, Vega, D3 ...
- **Wysiwyg** edition, standalone HTML **export**

## Setup:

- pip install py-chalk-it
- or online

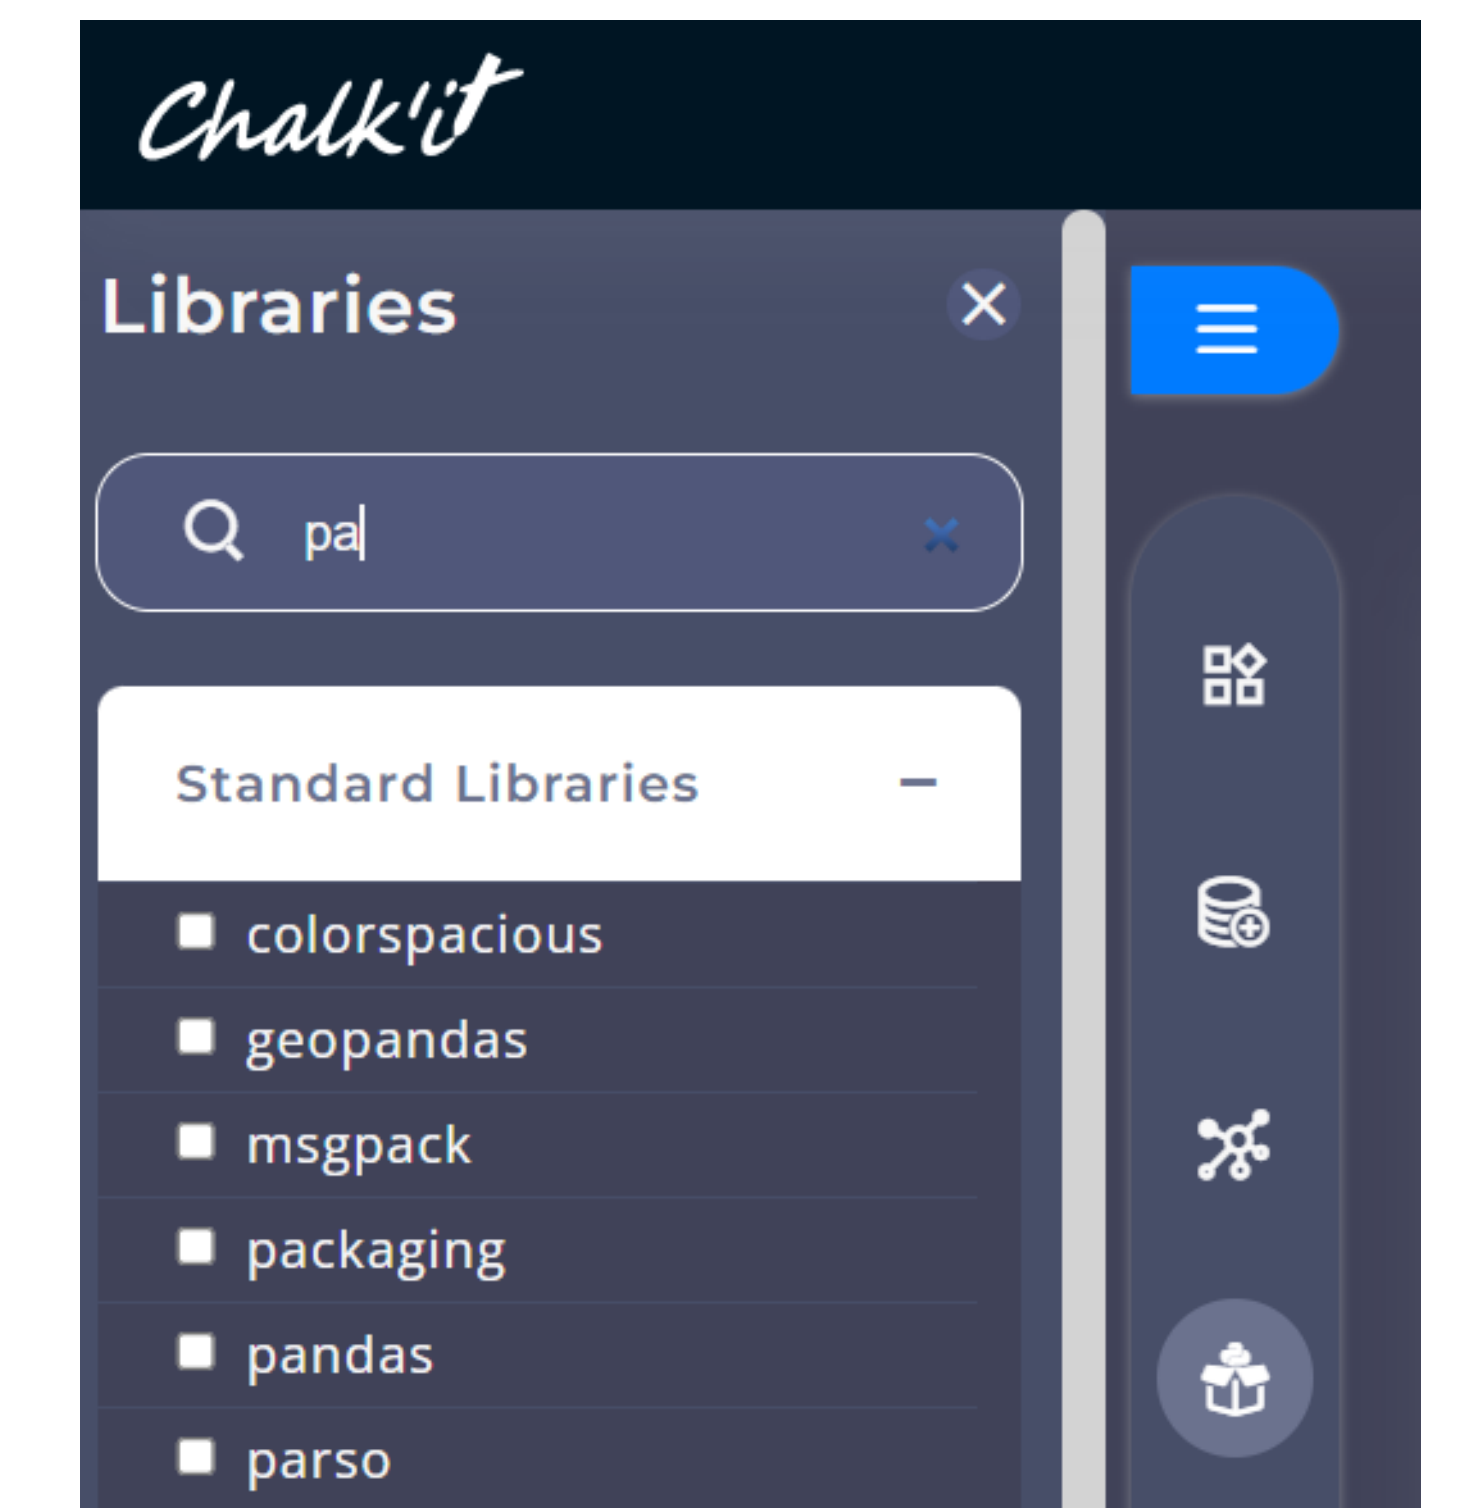

Mongi BEN GAID<sup>1</sup>, Abir EL FEKI<sup>1</sup>, Bruno LETY<sup>1</sup>, Gilles CORDE<sup>1</sup>, Tristan BARTEMENT<sup>1</sup>, Ghiles HIDEUR<sup>2</sup>, Mathieu FERAILLÉ<sup>1</sup>

<sup>1</sup> Carnot IFPEN Transport Energie, 1 et 4 avenue de Bois Préau, 92852 Rueil-Malmaison, France

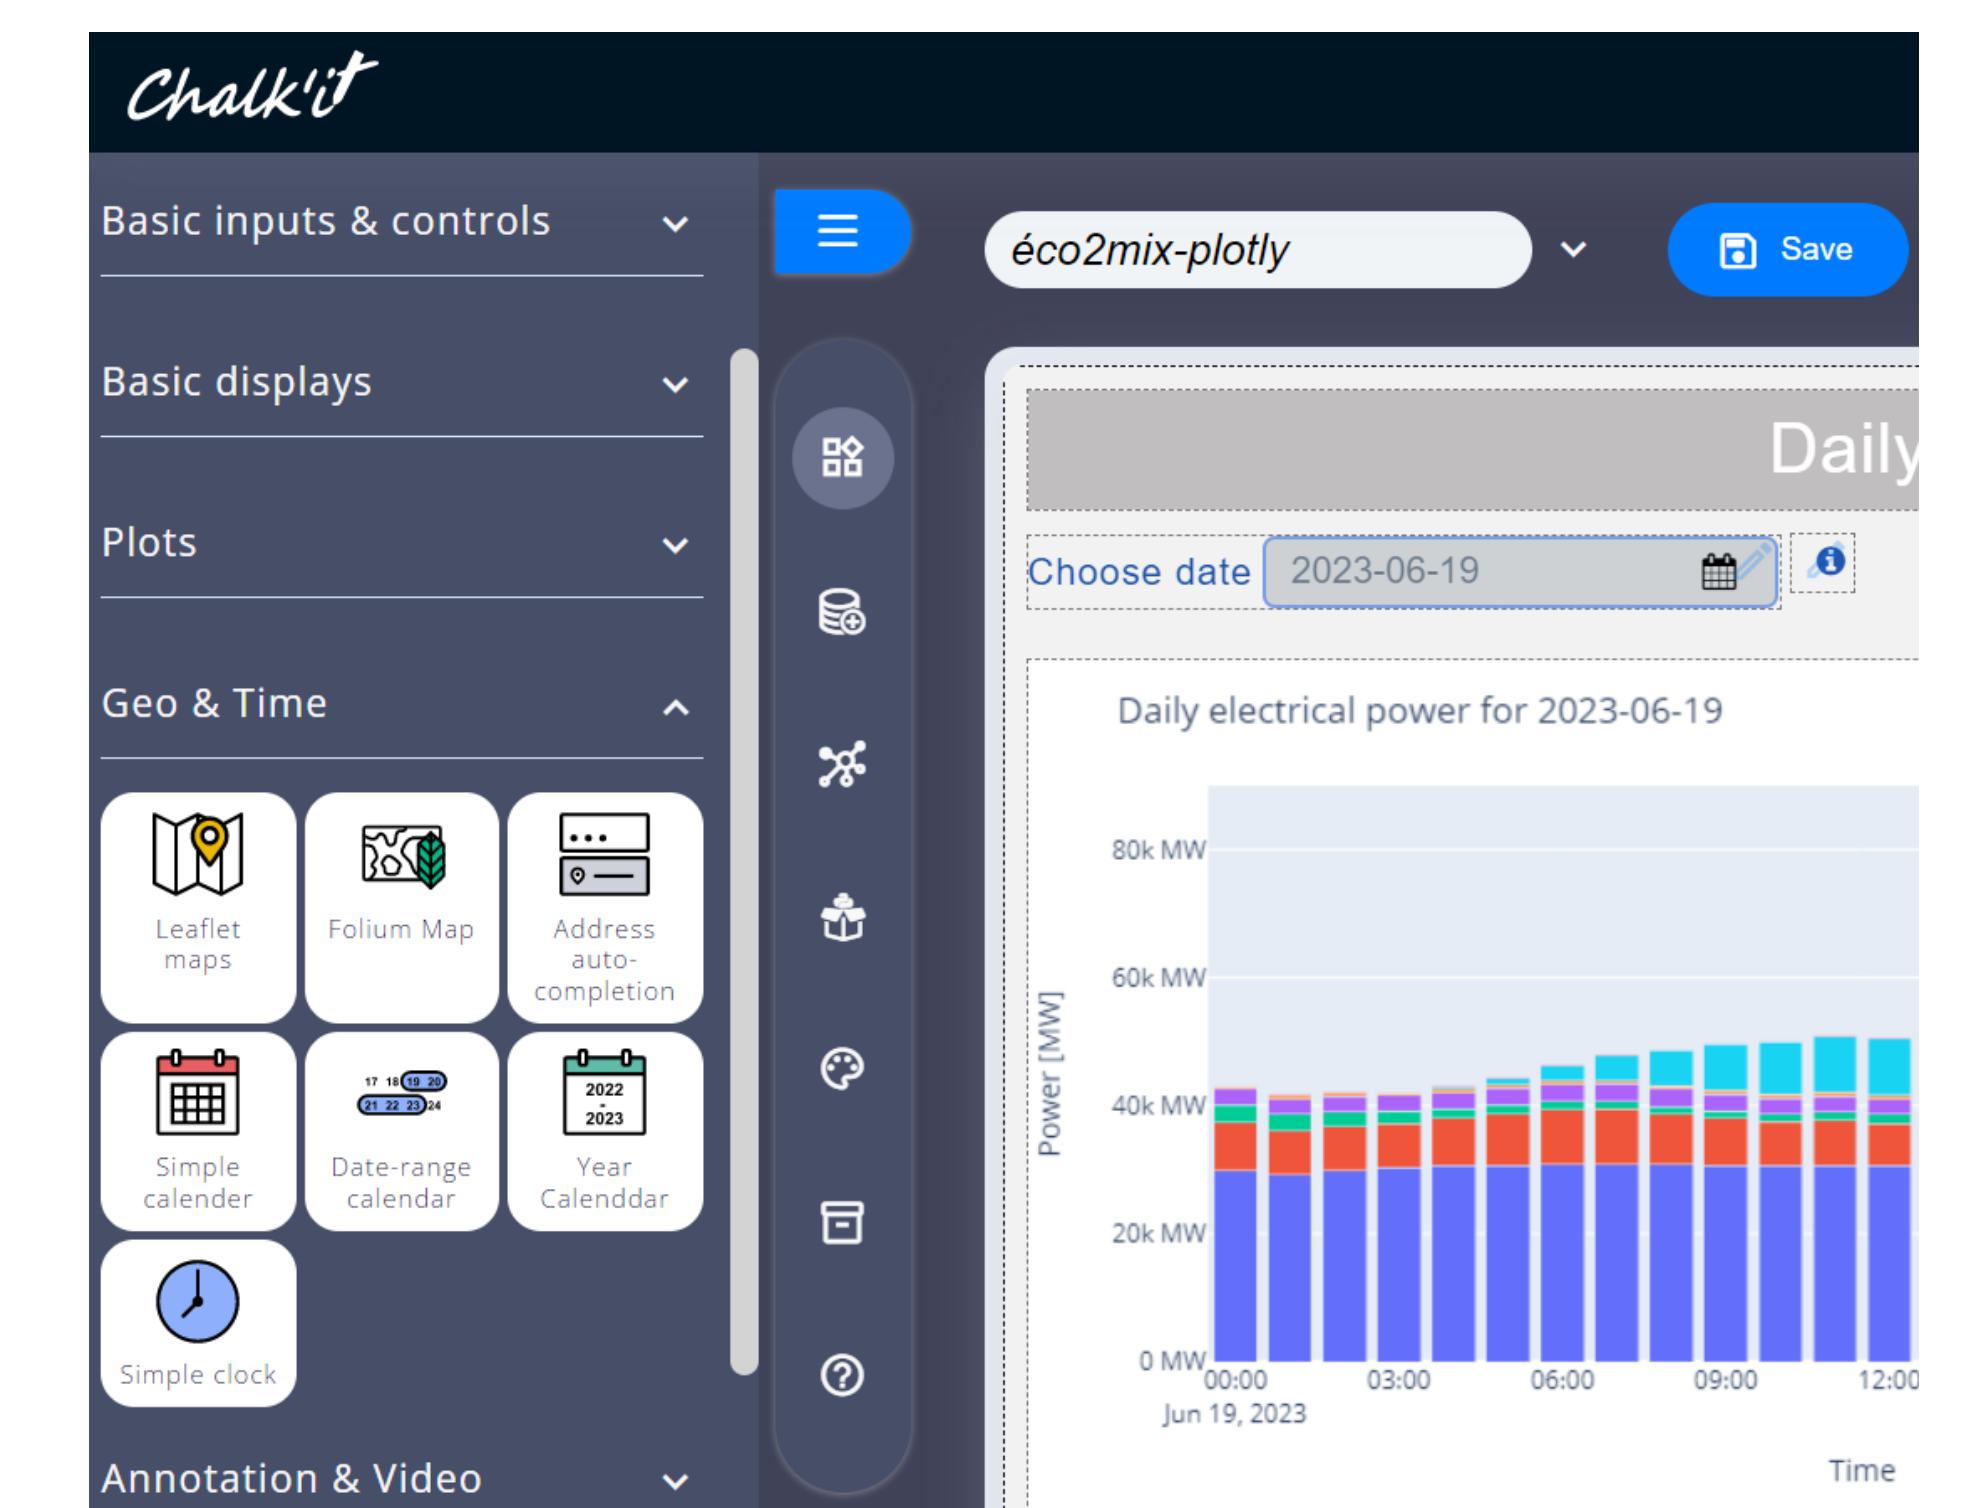

<sup>2</sup> DEV SERVICES, 24 Avenue de Poissy, 78260 Achères

## Usage:

- Add Python libraries

- Drag and drop widgets

- Write Python code & create interaction and orchestration dataflow
